Mr. KUCHEL. Mr. President, in conclusion, I hope very much that the program may be one continuing means by which this parliamentary organization may indicate to the youth of America that it wants them to play their part in arriving at the responsibilities of citizenship so that our free government may continue.

Mr. KEATING. Mr. President will the Senator yield?

The VICE PRESIDENT. The time of the Senator has expired.

Mr. KUCHEL. Mr. President, I and unanimous consent that I may have I additional minute.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. KUCHEL. Mr. President, I yield to the Senator from New York.

Mr. KEATING. I join the Senator from California in saluting the various Senators who have participated in the program. Personally I was thrilled in meeting the young people who were chosen through competition in the various States. I hope they will gain from their contact with Government officials, including Members of the Senate. I am sure that Senators have gained from their contact with the students.

Mr. KUCHEL. I thank my able friend, who has played a very prominent part in the U.S. Senate youth program.

## AIRPOWER IN THE ILL-FATED BAY OF PIGS INVASION OF CUBA

The VICE PRESIDENT. The Chair recognizes the Senator from Texas (Mr. Towns.

Mr. TOWER. Mr. President, the Attorney General says that U.S. sirpower was not involved in the ill-fated Bay of Pigs invasion of Cubs, in April 1961. The U.S. News & World Report, in its February 4 edition, gives the following excerpts of actual messages from the beachhead during the 3 days, April 17 to 19. as follows:

SAW to air command: "Brigade command." er on Riue Beach says he must have jet su port. He is under heavy attack by Mig je and heavy tanks. Pope.

RAW to air command: "Blue Beach under air attack by four jets and two Sea Furies. Where is our jet cover? Pope."

SAW to air command: "First battalion under heavy artillery attack. Also Blue Beach from east. Request air knock out artillery as soon as possible. Where is our jet cover gone to? Pepe."

air command: "Where are F-51" To (F-60's-World War II model aghter planes) and transport? Enemy tanks attacking east

side of Blue Beach. Pepe."
To bese: "Barracuda, Marsopa, and Lou (code names for invasion ships) cannot arrive Blue Beach, discharged and leave by daylight. Request jet cover for us in beach-

To base: "Marsopa proceeding Sine Beach with three Lou's (landing craft). If low jet cover is not furnished at first light, believe we will lose all ships. Request immediate reply. Blue Beach under attack by Mig's and T-53. Request immediately jet support or cannot hold. Pepe."

To base: "Will Blue Beach have jet cover tonight and tomorrow? Request air cover stay lower down as enemy planes come in low. Was attacked by jets after own bwn cover arrived. Did not receive help from air cover. Pepe."

To air command: "Tell Cuban pilots we are fighting last-ditch stand. Give them gasoline and ammunition. Road north to Covadongs is full of enemy and there is ar-tillery east and west of Siue Beach."

To air command: "Can't yeu throw some-thing into this vital point in the battle?

Anything. Just let pilots loose. Pepe."

To hase: "Do you people realise how desperate the situation in? Do you back us or quit? All we want is low jet cover and jet slose support. Enemy has this support. I need it badly or cannot survive. don't desert us. Out of basooks and tank ammo. Tanks will hit me at dawn.

To air commander: "Blue Beach under at tack by B-86. Where is promised air cover? Pepe.

Mr. Provident, those me conclusively that jet cover was expected. The only jets in the area were those based upon s U.S. carrier, standing by just ever the horison during that period

Ine saly other jets were those bear teachy Florids. It is my farvant b that we shall soon discover the facts of the situation.

## BOVIET BUILDUP IN CUBA

Mr. KEATING, Mr. President, the Soviet buildup in Ouba is mounting anew, and exceedingly serious evidence arrives daily. Not only are the Soviets building up their existing forces and equipment in Cube into a state of topnotch readiness, but additional material and equipment continues to now into the island under suspicious circumstances.

In his press conference of last week, the President said that we have had evidence of only one large yessel carrying predominantly military equipment into Cuba since October. The very next day, on Friday, January 25, a second large sel arrived. Under maximum accurity conditions, it unloaded a targo of armsmente.

. The route followed by these two ships is generally termed a "maximum security route." a passage traveled by the Boviets through areas where the United States le least able to maintain adequate parveillance of ships' contents.

It is also, ominously enough, the iden-tical route followed last summer by the first of the Soviet vessels carrying medium-range, ground-to-ground missiles into Cuba.

. While the Soviets continue to ship military equipment under tight security military equipment under light security conditions into Cuba and to unload it at docking points where pulsiders are rigiously excluded—only Soviets are allowed to handle it—there is also a semi-monthly passenger steamship service between Caba and Russia and a weekly homstop Moscow-Havana flight. These provide a wide and its light. provide ample facilities for the Soviets of transport additional southment to their newest satellite—under conditions that make tight U.S. surveillance under cut. If not impossible

A part of chargest posterior structures and

Approved For Release 2004/06/23: CIA-RDP65EIVE-88-00107/007/36-001

Communist bloc, there is continuing, absolutely confirmed and undeniable evidence that the Soviets are maintaining and guarding the medium-range sites they had previously constructed in Cuba. There has been no Soviet move to dis-mantle these concrete sites or withdraw the launching bases, as one might expect if the Boviets intended in good faith to keep these missiles out of Cuba in the future.

On the contrary, the Soviets' 24-hour maintenance of these sites gives rise to the very real possibility that Russia hopes to return the heavy missiles to the island and get them into commissionor, even more ominous-that they may have missiles left on the island and a only to wheel them out of caves. Let me make clear that I have no confirmed evidence now that there are still ground-toground missiles or mobile missile launchers or simers for these missiles in Cuba, but the Boviet activity around these sites cannot help but raise a number of serious questions. Without ensite inspection, it is hard to see how we will ever know for sure the true missile situs. tion in Cuba.

Finally, I have no idea that the Soviets are planning to attack the United States directly. What they are planning to do-in fact they are already doing it-is mount an increasing wave of sabotage, terrorism, political subversion, and agitation throughout Latin America. Already riots in Venezuela, Peru, Brazil clearly and demonstrably are the work of Communists trained and armed in

We can expect this to get worse and worse. Economic progress and development in Latin America, such as that planned under the Alliance for Progress, will become infinitely harder to achieve, if not impossible. Private capital wil flee the continent. No amount of U.S. aid will be able to fill the gap. This is in progress, but it will hit a new crescendo, for Castro is now proving that he has survived the latest crisis, that he is able to defy both the United States and the Organization of American States. His supporters in Latin Amer-

ica, cowed in October, are taking heart again. The time will come when the United

States will have to make the hard choice—get rid of this advance Communist arsenal, no matter how, or give up Latin America. The Alliance for Proggress could do a lot of good-in a stable political climate—but to invest U.S. funds for long-term, carefully balanced, economic development projects in Latin America while Castro is investing Soviet funds for guns and terrorism, is like trying to ours a cancer patient with vitamin pills. I have nothing against vitamin pilis—in fact I take them myself but we are only fooling ourselves and our friends if we think they will cure the cancer that Castro is injecting in the very bloodstream of Latin America.

It is so much easier, to destroy than to build. The time will come when we will have to abandon Latin America or get rid of this cancer. Furthermore, the Soviets are building Cuba up to the

point where it will be impossible to get them dut with conventional weapons. Cabe is becoming an impregnable forter ress furt as fast as the Seriote sen make

it so.

One objective may be to make it so difficult for us to use conventional weapons that it will turn out to be so effort to force the United States to use nuclear.

weapons. These amoint form assessed the October Cuben erhis, in my judgement, was the advantage the United States derived from the fact that we had the shoice. We sould decide what waspcon and tools we wanted to use. The Soriets had only one effective shales missiles. As a result, they backed down. But when the newest floviet buildup in Cube is completed, when all equipment is unloaded, installed, and defended, our positions will be reversed. It will, be elearly impossible for any number of native Cuban forces to dislodge the Soviet might. And it may also be imcosible for any American forces to disledge it using conventional weapens; am very much afraid this may be the long-range Soviet objective. If we p it there to achieve it, then national independence, political stability, and economic development will be forever impossible, not only in Cubs, but throughout South America.

I intend to speak on this subject at greater length next week and offer some definite proposals as to what we can do. But the need right now to for facts. The American people have the right to know how many ships are landing in Cuba. what supplies they are bringing, what the Sovieta now in Cuba are doing, and what it means for the long-term a of this entire homisphere. Cabe's ex-plosive potential in the Western Hemisphere is increasing week by week. to the same times.

## THE UNDECLARED WAR IN VIETNAM

Mr. YOUNG of North Dakota, Mr. President, I share the concern of many people in my state and elecwhere ever what amounts to our involvement in an undeclared war in Vietnam. Many brave Americans are losing their fives in Victuam just as they did in the undeclared war in Korea.

Mr. President, I completely share the feeling regarding this matter as expressed so well in a secent solumn by David Lawrence, which appeared in the Grand Forks Herald of Grand Porks, N.D., on January 16, 1963; and in another column by David Halberstam which appeard in the Minneapolis Morning Tribune of Minneapolis, Minn., on January 26, 1963.

Mr. President, I ask unanimous edusent to have these two columns printed in the Record as a part of my remarks.

There being no objections, the columns were ordered to be printed in the Riscons. as follows:

Prom the Grand Porks (Minn.) Merald, Jan. 16, 1960]

It is recognized, of course, that a President sky takes theoretically listent republished in a attack to made of instant retiliation if an attest to measured Con-ignate would even then be asked to authorize any continued warfare. Under the North Atlantic Treaty Organization, the United States is pieded to regard in attack on any of the member states as being just the same of an attack on the United States. But after the initial steps have been taken, the Otto-gries in supposed to furnish the necessary green in stuppe authorit

sthority to earry on the war.

Just why the administration has not premeted the facts about the situation in South Victnam to the American people is a mystery. Informal and confidential talks with members of the foreign relations committee of Congress have been held by the Department of State. But these are by no means a subtation. American hope have already been hilled in action in South Victoria, and many more of them may be energied in the Congo or other parts of the world to quell local disturbances.

The U.S. Government today has taken the position that, under the assumed authority of the United Nations, American advicers and equipment can be used in the Congo to settle by force an internal way in a state which covere a considerable area in central Africa.
